Remarks:

- The 220V socket supplied for decorated space booths is **NOT** to be used for lighting connection purposes. Exhibitors for shell scheme are not permitted to fix their own spotlight or fluorescent light. Special lighting supplies by exhibitors can be handed over to Viewshop Exhibits & Display (Shanghai) Co., Ltd. for installation at a nominal price.
- The connection service requires exhibitors to bring their own ports or facilities. Otherwise, please contact Mega Expo for individual connection service quotation.
- Exhibitors who have raw space should order a three phase outlet for lighting purposes. A separate power outlet should be ordered for any machinery in the booth. An application form of removing leakage protection device must be submitted together with ordering separate power for machine usage only. (Please contact Mega Expo for the blank form).
- All three phase power point orders must be marked out at the stand floorplan of the whole hall. MEGA EXPO will install it at any place in your stand if no instruction received before **May 13, 2022**. **Kindly be noted that requests for re-positioning of power outlet is unaccepted on site.**
- **Exhibitors with very sensitive equipment are advised to bring their own stabilizer to cater for voltage fluctuation.**
- All items ordered are on rental basis and exhibitors will therefore have to make good of any damages or losses.
- Any complaint regarding rental items or installation must be lodged the day before the exhibition commences. Otherwise all items are deemed to be received in good order and condition.
- Payment must be made within 30 minutes after online order.
- Full cost of equipment or services will be applied for any cancellation of an order after **May 13, 2022**.
- Late order (after the deadline of **May 13, 2022**) will be surcharged 30%. Any order received after **May 27, 2022** and any onsite order will be surcharged 50%.
- The contractor should provide the copy of the electrician certificate and the information should be the same as the electrician operating on the show site. The contractor should update the reported information to MEGA EXPO if there is any change.
- **NECC will send staffs to all the booths to ensure booth facilities are completely and properly installed, from 10:00 on Jun. 14, 2022. After inspection, power supply will be in place for those qualified booths.**
- **For special cases, applications on early power supply need to be submitted to MEGA EXPO before May 13, 2022. Onsite applications will not be entertained. Exhibitors are then required to finish the installment of their facilities before 16:00 on Jun. 13, 2022, inclusive of the connections of electrical boxes. NECC will send staffs for onsite inspections on these booths one by one afterwards. Power supply will be in place by 18:00 for those applying early power supply and qualified booths.**
- **Power must be switched off after show closes every day. If the exhibit requests 24 hours power on during show time, please apply to Mega Expo before May 13, 2022. 24 hours power is only valid for machine, while all lights must be switched off still.**
- **A monitoring box will be installed together with each power outlet. The price shown on the order page has included the monitoring box. An application form of removing leakage**

protection device must be submitted together with ordering separate power for machine usage only. (Please contact Mega Expo for the blank form.) The power outlet for machine usage must be ordered independent of lighting system. If the power outlet is not separated from lighting and machine, or the power outlet is mistaken for lighting or machine, the power supply may be rejected to be offered. In this case, additional power outlet will be requested to be ordered. Kindly be noted that additional onsite order may be rejected because of the limitation of hardware.

- EAC is not allowed to open the cover plate of power/water/air well. The structure or any items on the cover plate must be designed to be removable so that the technician can handle the well when necessary. If the cover plate is completely held down that cannot be opened, the exhibitor/EAC needs to re-order the power outlet by onsite price. Kindly be noted that additional onsite order may be rejected because of the limitation of hardware.
- It is ruled that each raw space stand must rent and install fireproof three-piece set no later than the noon of June. 14. Onsite PIC must scan the QR code on the set, take photo and register for locating every morning and every afternoon during the show day. It may affect the re-funding of deposit, if the raw space stand does not register on time. Kindly be noted that, the system will use the PIC on safety construction guideline as the PIC who registers the three-piece set on site as default. EAC must update the actual PIC on site when rent the three-piece set at business centre, if the PIC of safety construction guideline will not be on site everyday.
